Property Imagery

Integrated property imagery for virtual validation of property characteristics

To remain competitive, today's insurer is continually on the hunt for cost effective measures that increase the efficiency and accuracy within their new business workflow.

Property Imagery from CoreLogic® helps insurers virtually validate property characteristics and determine current conditions at point-of-sale. Unknowns such as, "Is the pool fenced-in?" or "Does the kitchen have granite countertops?" could be answered now via a photo—without a separate phone call to the homeowner or a costly inspection.

<p>PROPERTY IMAGERY: Home Exterior (Front)</p> <p>STORIES: 2</p> <p>GARAGE: Attached</p>	<p>PROPERTY IMAGERY: Home Exterior (Back)</p> <p>POOL: Yes</p> <p>HOT TUB: Yes</p> <p>FENCE: Yes, Wood</p>	<p>PROPERTY IMAGERY: Home Interior (Kitchen)</p> <p>GRADE: Custom</p> <p>FLOOR: Ceramic Tile</p>
--	---	--

BENEFITS INCLUDE:

- ▶ An average of nine photos per property within the Property Imagery data set
- ▶ Images provide detailed exposure to risk during the quoting process
- ▶ Understand actual condition during the quoting process
- ▶ Verify quality grades such as custom kitchens
- ▶ Helps prioritize inspection expenditures
- ▶ More accurate property profile for improved ITV

Why CoreLogic?

Unlike standard aerial or street view imagery, Property Imagery is an industry first, providing an average of nine interior and exterior photos per property to enable:

- ▶ Increased efficiency within the quoting and new business workflow
- ▶ Potential reduction in inspection expenditures
- ▶ Exposure to hidden risk previously unknown in the quoting process
- ▶ A more accurate property profile for improved ITV

Get the Whole Story™

With the addition of Property Imagery to the RCT Express® risk assessment and valuation platform, CoreLogic is proving a commitment to provide Insurers with yet another valuable risk assessment tool.
