

Esri® ArcGIS® Enterprise

CoreLogic® Spatial Content Now Offered Via Transactional Pricing

Improvements in technology and ease of access to spatial data enable businesses to increase agility and organizational efficiency. At CoreLogic, we build our solutions with your business needs in mind. We know that efficiency and accuracy are important to you and that's why we've made it easier to access our industry-leading GIS and property data solutions through our integration with Esri ArcGIS Enterprise.

We offer several levels of data packaging and two ways to pay for it; enterprise-wide subscription based and most recently transactional, "pay as you go" pricing.

If you're settling for less than the whole story from your data, let us help you get the data you need, right on the money, and packaged your way.

About ParcelPoint®

ParcelPoint is a geospatial solution that captures boundary and centroid data for 3,022 counties, accounting for 156.3 million parcels nationwide. The result is a significantly improved level efficiency, positional accuracy and parcel depth for GIS applications or location-based solutions.

About SpatialRecord

SpatialRecord is your single-source, parcel-level information solution that simplifies record management for a variety of businesses. SpatialRecord provides the ability to access location and property attributes so that you can make critical decisions quickly and more accurately.

LOCATION
INFORMATION
SOLUTIONS

Easy Access of CoreLogic Content:

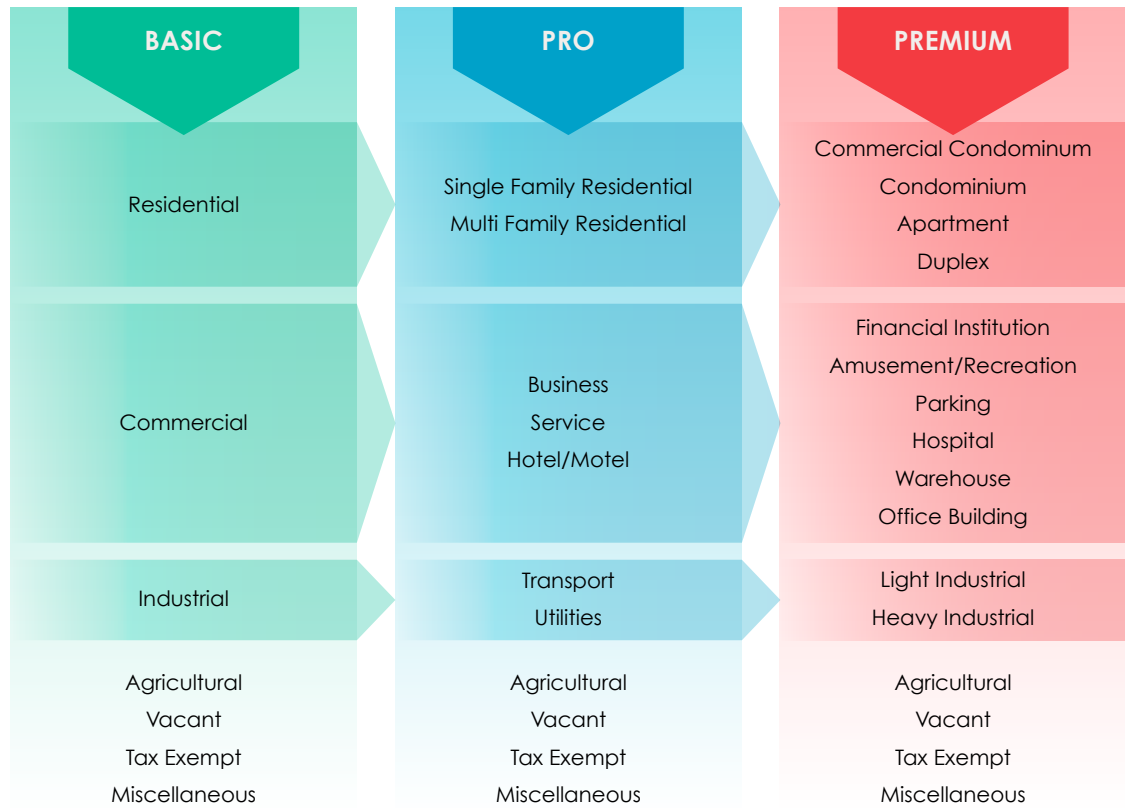

- ▶ ParcelPoint®
- ▶ SpatialRecord
- ▶ Property Use

Location and Property Data on 99% of U.S. Properties

About Property Use Data

Three different levels and two unique formats gives you the flexibility to access only the data you need. With data from 3,022 counties, the Property Use Data solution delivered through ArcGIS Enterprise provides the highest level of information concerning property usage across the United States.

How to Get It

Our map and feature services are available as follows:

- ▶ Annual subscription enables a known cost or fixed budget up front for the license period.
- ▶ Transactional leveraging Esri custom-built technology allows you to pay only for what need.
