

CoreLogic[®] Early Stage Program

Data is at the Core of Smart Decision Making

The CoreLogic Early Stage program offers eligible start-ups in the sector, pricing that is commensurate with your current funding level, with pre-approved tiered discounts for Pre-Seed through Series E businesses.

Unique Property-Level Insights

Stakeholders from iBuyer, PropTech, FinTech, ConstructionTech, InsurTech and SMART Technology companies can all benefit from our unique property-level insights to assess risk, identify and manage growth opportunities and improve business performance. We transform raw data into high-value information, analytics and services, and are the industry-leading foundational data provider you need to fuel your business.

Our Data Differentiators

Breadth & Depth

We deliver comprehensive information from across the property ecosystem, have 50+ years of historical data and experience building solutions, and refresh our data daily.

Closest to the Source

We collect data directly from thousands of diverse sources, with 5,000 types of unfiltered content, and cross-validate it for accuracy.

Standardized & Consistent

40+ proprietary algorithms provide consistency across 3,100+ counties, and we layer on added intelligence, with computer auditing of records and even human reviews of flagged records.

On-Demand Integration

We have the building blocks for safe and seamless data sharing via API connections.

Realize Your Business' Full Potential

- **Public Record Data:** We apply strict standardization to all incoming data and adhere to a rigorous governance program to produce actionable business insights.
- **Automated Valuation Models (AVMs):** CoreLogic AVMs leverage new cascade methodologies and contain real estate databases covering 3.5B+ records.
- **Real-Estate Indexes:** CoreLogic MarketTrends, Home Price Index (CoreLogic HPI™ and S&P CoreLogic Case-Shiller Indexes™ deliver early comprehensive views of real estate market and home price trends.
- **Geospatial Data:** Leverage location information, including parcels and structure footprints, along with natural hazard information to make smarter data and location-drive business decisions.
- **Direct Marketing:** Our property and homeowner data repository covers 99% of the U.S. population. Leverage our data for your digital, online and offline campaigns.

Tap into the power of the nation's most expansive and comprehensive real estate and homeowner database.
