

EnVision™ from CoreLogic®

Portfolio Analytics & Monitoring, So Simple It's Smart.

EnVision™ from CoreLogic® is an intelligent analytics tool leveraging proprietary industry benchmarking data, your valuation data, natural hazard risks, and agent metrics to monitor the performance of your portfolio.

This innovative business intelligence platform provides data-driven insight that lets you easily monitor over/undervaluation trends, understand agent performance, compare key performance metrics to competitors, and identify growth opportunities.

Designed with interactive dashboards and reporting modules, EnVision offers a macro-level view of your portfolio so that you can more effectively compete in today's market without having to build your own tools.

RISK
MANAGEMENT

Use EnVision to:

- ▶ Transform your property data into actionable intelligence
- ▶ Gain competitive edge by comparing your performance metrics to industry benchmarks
- ▶ Get insight on agent performance and system utilization of best practices
- ▶ Report on your key performance indicators (KPIs)
