

SOLUTION ABSTRACT

Get Ahead Of The Competition

Automation and Cost Reduction Delivered With AVM Cascade

A California Financial Institution Needed:

- ▶ Access to current AVMs, its current AVM environment had become outdated, costly and uncompetitive.
- ▶ Desired a decision management solution to enable them to choose among multiple AVMs, establish customized business rules and tighten permissions amongst its multiple users.

Solution:

- ▶ AVM Cascade feature enabled client to instantly automate its underwriting business rules for AVM selection.
- ▶ An administrative function allows them to monitor and control usage.
- ▶ The AVM sequencing rules, along with built-in access to AVMs such as ValuePoint®4, PowerBASE®, Home Value Explorer® (HVE) and CASA® took the hassle and guesswork out of the selection process.

Results*:

- ▶ The client has reduced costs by approximately 10% per month by optimizing the AVM Cascade and monitoring usage with the administrative module.
- ▶ The entire user group participated in an online training session which accelerated implementation and adoption and helped users understand other time and cost saving features such as retrieving property detail information and comparables.

* Results are estimates and actual returns and/or savings will vary based on a number of product and client factors.
