## New Standard Flood Hazard Determination Form Released

The new version of the Standard Flood Hazard Determination Form (FEMA Form 086-0-32, formerly 81-93) has been made available on [FEMA's website](#). According to FEMA, lenders and their service providers have six months to transition to the use of the new version. The new version incorporates the following changes:

- Section I, Field 2 changed from “**COLLATERAL (Building/Mobile Home/Personal Property) PROPERTY ADDRESS (Legal Description may be attached)**” to “**COLLATERAL (Building/Mobile Home/Property) PROPERTY ADDRESS AND PARCEL NUMBER (See Instructions section for more information).**”
- Section II.B., Field 3 changed from “**LOMA/LOMR**” with a “**Date**” entry field to “**LOMA/LOMR Number**” and the removal of the “**Date**” field.
- Section II.D. includes the following new language with respect to buildings not in the Special Flood Hazard Area: “**Please note, the risk of flooding in this area is only reduced, not removed.**”

We urge you and your compliance or legal teams to review the new form and consider its impact on your business. You may share your comments or questions with our compliance group by e-mailing us at [floodcompliance@corelogic.com](mailto:floodcompliance@corelogic.com).

In the meantime, CoreLogic will be working to incorporate the new form into our product offerings, which we anticipate to be done well within the six month transition period. We will update you once we have completed this change.
