NFIP Extended to February 8

Congress passed a Continuing Resolution yesterday which serves to extend the NFIP until February 8. The law serves as the mechanism for the continued funding of the federal government but does not make any reforms to the NFIP. This action by Congress comes three days after the government was shut down and the [NFIP lapsed](#). The impact of this lapse should be limited given the duration, but we encourage you to monitor for any agency communications if you have questions about any particular impact.

Given the need for Congress to take further action prior to February 8, you may consider working with your government affairs department or appropriate trade association on outreach to Congress in support of the program and a further extension or reauthorization.
