

# RiskMeter Online™

Underwriting automation, consistency, and efficiency—  
at your fingertips

With RiskMeter Online, the P&C industry now has on-demand access to comprehensive natural hazard risk information. Using premium natural hazard data and probability models from CoreLogic®, this user-friendly tool helps underwriters, brokers, agents, and other businesses easily assess and price multiple types of natural hazard risk simply by entering an address or by uploading a book of business.

RiskMeter Online is web-based and doesn't require costly and time-intensive maintenance or updates. Yet the tool is easily customized to fit an insurer's underwriting guidelines and risk accumulation requirements. Providing over 30 natural hazard risk reports, RiskMeter leverages the power of PxPoint™, our parcel-level geocoding engine, to provide positionally accurate property risk assessments.

The combination of parcel-level location accuracy, science, and premium natural hazard data from CoreLogic helps insurers optimize underwriting quality and make better business decisions while improving the agent and customer experience.

## Write More of the Right Business

The RiskMeter Online user can instantly view premium natural hazard data and scoring reports online and then choose to save a PDF version. Display maps can be customized by aerial or street view and, for large parcels with multiple structures, the user has the ability to assess risk on a specific building or buildings within the parcel. The One Click Ruler tool allows the user to verify the distance between the structure and any given point on a map—critical when an exact distance is required from a natural hazard risk.

Building replacement costs and characteristic information such as square footage and the year built is also available through easy to understand data reports. A Policy Exposure Module provides real-time insight into the carrier's existing policies in the area, as well as the company's pre-defined exposure limitations.

All this helps increase an underwriter's responsiveness and speeds up the application process so that they can write more of the right business.

The ability to quickly screen for natural hazard risk can help insurers streamline their underwriting process and reduce the sales cycle for agents and brokers.

## RiskMeter Online Key Features:

- ▶ Affordable, easy to use, on-line access
- ▶ Customizable to specific underwriting guidelines
- ▶ Aerial photos, one click measuring, and manual placement tools
- ▶ Parcel-level geocoding from PxPoint
- ▶ Over 30 natural hazard reports
- ▶ Trusted and used by industry leaders
- ▶ View display maps and save PDF reports
- ▶ Single property or book of business batch processing
- ▶ Available via web browser or web services

**In addition to natural hazard reports, access premium tax information at local levels.**

## Why Consider CoreLogic?

Increasing catastrophic events and climate change are challenging the P&C insurance industry to revisit existing catastrophic risk management and loss adjustment strategies by improving the overall understanding of all natural hazards.

CoreLogic is dedicated to the science of understanding natural hazard risk. With a staff of Ph.D.-level scientists, we have taken risk assessment a step further by developing a proprietary methodology that assesses the future risk of a wide range of natural hazards. The RiskMeter Online user can pinpoint one location, multiple locations, or even choose to upload a batch file to better understand risk for one or all of the following types of natural hazards:

- ▶ Coastal Risk
- ▶ Wildfire Risk
- ▶ Flood Risk
- ▶ Fire Protection
- ▶ Earthquake Risk
- ▶ Wind & Hail Risk
- ▶ Sinkhole Risk
- ▶ Lightning Risk
- ▶ Crime Risk
- ▶ And More

Additionally, we offer premium tax information for all twenty U.S. states that collect premium tax at local levels. Available through web services as well as RiskMeter Online, high quality premium tax data helps insurers accurately identify the correct premium tax to assign to a given insurance policy or policies.

RiskMeter Online™ helps improve the agent and customer experience
