

# Verification of Employment and Income (VOE/I)

## Verify Every Borrower

CoreLogic® Credco® provides a comprehensive Verification of Employment and Income (VOE/I) solution that takes the frustration, delays and costs out of the traditional verification process.

### One-Stop to Verify Every Borrower

CoreLogic can efficiently and reliably conduct all of your borrower employment and income verification needs, so you don't have to. Our three-step "waterfall workflow" ensures that every borrower you submit can be verified.

#### Step 1: Instant Verification

CoreLogic delivers instant verification via our direct integration with The Work Number (TWN). If your borrower's employer provides data to TWN—we will deliver an instant verification to you.

#### Step 2: Automated Verification

If your borrower's employer does not report employment and income data to TWN, we will leverage dozens of automated employment and income verification sources—often returning results the same day.

#### Step 3: Manual Verification

If your borrower's employer does not report employment or income data to any third party, our dedicated team of verification experts will immediately initiate our manual process and deliver a fully-documented employment and income verification to you.

### The CoreLogic Advantage

Our comprehensive VOE/I solution:

- Delivers Quick and Easy Ordering Process
- Provides Real-Time Tracking with Detailed Statuses
- Satisfies Agency, GSE, Investor third-party employment and income verification requirements—either as a primary verification or as a re-verification prior to closing

For more information on Verification of Employment and Income, contact a CoreLogic sales associate at 866-774-3282 or visit us online at [corelogic.com](https://www.corelogic.com).
